

Connector-Terminal Block Conversion Units use a Cable to connect all PLC inputs and outputs at once. Wiring and installation time are cut and maintenance is simpler.

## Features

**Slim Connector-Terminal Block Conversion Units contribute to downsizing control panels and automatic equipment.**

### XW2D

- Mounting area reduced by 35% (in comparison with 40-pole XW2B Units.)
- Fallout prevention for terminal screws.
- Terminal screws arranged by color to simplify counting terminal numbers and ensure more efficient wiring.

Refer to pages 3 to 5.

**An extensive series with Connector-Terminal Block Conversion Units for a wide range of applications.**

### XW2B

- Series includes both Through-type Connector-Terminal Block Conversion Units, as well as Special Servo Relay Units and Terminal Blocks for Motion Controls Units.

Refer to pages 12 to 22.

**Common terminal and LED operation indicators provided on terminal block.**

### XW2C

- Common terminal for device power supply on Units with two-tiered terminal block.
- For 16 inputs only.

Refer to pages 6 to 9.

**Three-tiered terminal block equipped with power supply common for easy input device connection.**

### XW2E

- Power supply common provided for input devices.
- Three-tiered terminal block simplifies wiring.

Refer to pages 10 to 11.

# Connector-Terminal Block Conversion Unit Connection Examples

**Note:** Refer to page 35 for Position Control Unit and Servo Driver connections.

## Controller Connections

XW2D Series (See page 3.)

**Programmable Controller I/O Units with Terminal Blocks, Board Computers, Etc.**

**E5ZD Multiple-point Temperature Controller Series**

**ES100 Temperature Controllers (for Expansion I/O)**

## SYSMAC CVM1/CV-series Motion Control Unit Connections

XW2B Motion Control Unit Terminal Block (See page 52.)

**SYSMAC CVM1/CV-series Motion Control Unit**

## Programmable Controller and Host Link Connection

XW2Z Host Link Cable (See page 58.)

### New Slim Connector-Terminal Block Conversion Units.

- Mounting area reduced by 35% (in comparison with 40-pole XW2B Units) to contribute to downsizing control panels and automatic equipment.
- Fallout prevention for terminal screws.
- Round or forked crimp terminals can be used.
- Mount to DIN Track or via screws. Unique DIN Track lock can maintain open status during DIN track attachment and removal.
- Terminal cover can be locked open.
- Screw terminals are arranged by color in groups of five to simplify counting terminal numbers.

### ■ Ratings and Characteristics

Rated current	1 A
Rated voltage	125 VAC, 24 VDC
Insulation resistance	100 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.)
Operating temperature	0 to 55°C

**Options (Sold Separately)**

**Connecting Cables for Connector-Terminal Block Conversion Units**

Refer to pages 23 to 31.

## Connector-Terminal Block Conversion Units with Two-tiered I/O Terminal Block with Common

# XW2C

Common terminal provided. Use for either PLC Input Unit or Output Unit merely by changing short bar.

### Ordering Information

No. of inputs	No. of poles	Model	Mounted Connector model	Cable Connector model
16	20	XW2C-20G6-IO16	XG4A-2031	XG4M-2030-T

Note: The Connecting Cable is the XW2Z-□□□□A described on page 24.

### Ratings and Characteristics

Rated current	1 A
Rated voltage	125 VAC, 24 VDC
Insulation resistance	100 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.)
Operating temperature	0 to 55°C

### Dimensions

XWS2C-20G6-IO16

#### Wiring Diagram

### Options (Sold Separately)

Connecting Cables for Connector-Terminal Block Conversion Units

Refer to pages 23 to 31.

## ■ Precautions

### Correct Use

#### XW2D/XW2C-20G6-IO16

##### Wiring

- Always turn OFF the power supply before wiring. Otherwise, cables or other conductors can short the terminals and cause the Unit to fail.
- Do not connect or disconnect Connectors with the power turned ON. Otherwise, it may cause malfunctions.

##### Wiring Terminal Blocks

- Using Crimp Terminals  
(With a Terminal Block with M3 Screws)

###### Round crimp terminals

###### Forked crimp terminals

Applicable crimp terminals		Applicable wires
Round crimp terminals	1.25-3	AWG22 to AWG16 (0.30 to 1.25 mm <sup>2</sup> )
Forked crimp terminals	1.25Y-3	AWG22 to AWG16 (0.30 to 1.25 mm <sup>2</sup> )

##### Terminal Screw Tightening Torque

- Use a tightening torque of 0.7 N·m when connecting wires or crimp terminals to the terminal block.

##### Mounting Units to and Removing Units from DIN Track

- XW2□ Connector-Terminal Block Conversion Units can be mounted side-to-side on DIN Track.
- Secure both ends of the XW2□ with End Plates.
- When removing the Unit from a DIN Track, insert a flat-head screwdriver into the slider and pull the lock out.

##### Handling M3 Screw and Round Terminals

- Raise the M3 screw with a Phillips screwdriver as shown in diagram (1) and slide the screw toward you to keep the space open. Follow the steps in diagrams (1) and (2) below when using round crimp terminals.

(1)

(2)

## Connector-Terminal Block Conversion Units with Common

# XW2C

Features like a common terminal and LED operation indicators reduce control panel wiring for input devices.

- Power supply common provided for input devices.
- LEDs indicate at a glance whether input signals are ON or OFF.
- Mounts to DIN Track or via screws.
- Connecting Cable available (sold separately).

### Ordering Information

No. of inputs	Input type	Model
16	NPN-compatible input (+ common)	XW2C-20G5-IN16

### Ratings and Characteristics

Rated current	1 A/common
Rated voltage	12 to 24 VDC
No. of circuits	16
Input indicator	LED (orange)
Power supply voltage range	12 to 24 VDC±5%
LED current	24 VDC: 10 mA/point max.
Insulation resistance	50 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min
Operating temperature	0 to 55°C

# ■ Circuit and Terminal Arrangement Diagram

## Wiring Diagram

## ■ Options (Sold Separately)

### Connecting Cables for Connector-Terminal Block Conversion Units

Refer to pages 23 to 31.

**Note:** Do not use the G79-□C (G7TC Connector with Cable) because it is wired differently.

## ■ Precautions

### Correct Use

#### Wiring

- Always turn OFF the power supply before wiring. Otherwise, cables or other conductors can short the terminals and cause the Unit to fail.
- Do not connect or disconnect Connectors with the power turned ON. Otherwise, it may cause malfunctions.

#### Wiring Terminal Blocks

- The following crimp terminals are applicable for terminal blocks with M3.5 screws.
  - 2-3.5 (round)
  - 2Y-3.5 (forked)

#### DIN Track Mounting

- Secure both ends of the XW2C with End Plates.

#### Terminal Screw Tightening Torque

- Use a tightening torque of 0.59 N·m when connecting crimp terminals to the terminal block.

## Connector-Terminal Block Conversion Units with Three-tiered Terminal Block with Common

# XW2E

A common terminal is provided for device power supply and the three-tiered structure means easier wiring.

- For 16 inputs only.
- The three-tiered terminal block simplifies wiring because the power supply terminal block is wired with just one crimp terminal.

### ■ Ordering Information

### Wiring Diagram

**Note:** This is not a row of terminals.

## ■ Options (Sold Separately)

### Connecting Cables for Connector-Terminal Block Conversion Units

Refer to pages 23 to 31.

**Simplifies Connector and terminal block replacement, and requires less in-panel wiring.**

- Mount to DIN Track or via screws.
- MIL Flat Cable Connectors and Multi-pole, Square Connectors are standard.
- Terminal blocks available with either M3 or M3.5 screws.
- Connecting Cables for Programmable Controllers available (sold separately).

### ■ Connectors

## ■ Applicable Connectors

Model	Applicable Connectors (See note 1.)	Hood (See note 1.)
XW2B-40F5-P	FCN361J040-AU (soldered) FCN363J040-AAU (crimped)	FCN360C040-B

- Note:** 1. All applicable Connectors and Covers are made by Fujitsu.  
2. Refer to the OMNUC U Series user's manual for details on the Connecting Cable used between the XW2B-40F5-P and the U-series AC Servo Driver.

## ■ Options (Sold Separately)

### Connecting Cables for Connector-Terminal Block Conversion Units

Refer to pages 23 to 31.

Contact your OMRON representative for information on the Connecting Cable used between XW2B Daisy Chain-type Connectors.

## ■ Precautions

### Correct Use

#### Wiring

- Always turn OFF the power supply before wiring. Otherwise, cables or other conductors can short the terminals and cause the Unit to fail.
- Do not connect or disconnect Connectors with the power turned ON. Otherwise, it may cause malfunctions.

#### Wiring Terminal Blocks

##### Direct Wire Connections with a Terminal Block with M3 Screws

1. Use a wire size between 0.3 and 1.25 mm<sup>2</sup> (AWG22 to AWG16).
2. Prepare the end of each wire as shown in the following diagram.

3. The wire insertion holes are 1.8 × 2.5 (H × W) mm on the terminal block with M3 screws.

##### Direct Wire Connections with a Terminal Block with M3.5 Screws

Applicable crimp terminals	Applicable wires	
Round	1.25-3.5	AWG22 to AWG16 (0.30 to 1.25 mm <sup>2</sup> )
	2-3.5	AWG22 to AWG14 (1.25 to 2.0 mm <sup>2</sup> )
Forked	1.25Y-3.5	AWG22 to AWG16 (0.30 to 1.25 mm <sup>2</sup> )
	2Y-3.5	AWG22 to AWG14 (1.25 to 2.0 mm <sup>2</sup> )

##### (With a Terminal Block with M3 Screws)

Applicable crimp terminals	Applicable wires	
Rod	TC-05 Dia. = 1	AWG22 to AWG18 (0.30 to 0.75 mm <sup>2</sup> )
	TC-1.25S Dia. = 1.5	AWG22 to AWG16 (0.30 to 1.25 mm <sup>2</sup> )
Blade	BT1.25-9-1 BT1.25-10-1 W = 2.2	AWG22 to AWG16 (0.30 to 1.25 mm <sup>2</sup> )

Round rod and blade crimp terminals are made by Nichifu.

#### Terminal Screw Tightening Torque

- Select a tightening torque from the following table when connecting wires or crimp terminals to the terminal block.

Terminal Block	Tightening torque N·m
With M3 screws	0.40
With M3.5 screws	0.59

#### Mounting Units to and Removing Units from DIN Track

- For terminal blocks with M3 screws, use a flat-head screwdriver like the one shown in the following diagram.

- XW2B Connector-Terminal Block Conversion Units can be mounted side-to-side on DIN Track. The flanges for mounting screws are located on each side at the bottom of the XW2B.
- Secure both ends of the XW2B with End Plates.
- When removing the Unit from a DIN Track, insert a flat-head screwdriver into the slider and pull the lock out.

Connect Connector-Terminal Block Conversion Units (XW2□) to I/O Units for Programmable Controllers with one touch.

### ■ Ratings and Characteristics

Rated current	1 A
Rated voltage	125 VAC
Contact resistance	20 mΩ max. (at 20 mV, 100 mA max.) (See note 1.)
Insulation resistance	100 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.) (See note 2.)
Operating temperature	-25 to 80°C

**Note:** 1. Contact resistance for the Connector.  
2. Dielectric strength for the Connector.

### ■ Materials and Finish

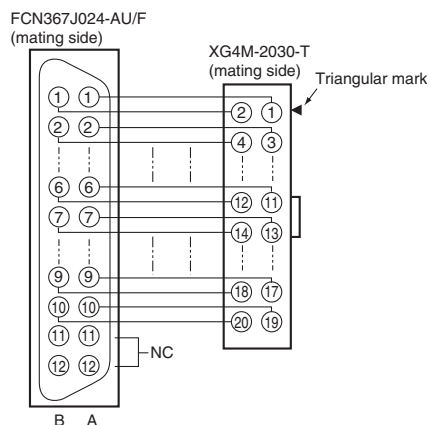

Item	Part name	Materials and Finish	
Connectors	XG4M-2030 XG4M-4030	Housing	Fiber-glass reinforced PBT resin (UL94V-0)/black
		Cover	
	Contacts	Mating end	Phosphor bronze/nickel base, 0.15-μm gold plating
		Press-fit end	Phosphor bronze/nickel base, 2.0-μm tin plating
	XG4T-2004/4004	Strain Relief	Fiber-glass reinforced PBT resin (UL94V-0)/black
	FCN-367J024-AU/F FCN-367J040-AU/F	Housing	PBT resin (UL94V-0)/black
		Contacts	Mating end
Press-fit end			Phosphor bronze/tin plated
	Connecting screw	Steel/nickel plated	
Cable	UL2464 Interface Cable	AWG28 or the equivalent	
Crimp terminal	Forked crimp terminal	1.25 Y AS 3.5 or the equivalent

Note: The XW2Z-□□□H-□G I/O signal arrangement is oriented the same as the Connector Cable for the G79 I/O Relay Terminal.

# For 32-point, MIL Connector-type I/O Units for Programmable Controllers

## XW2Z-□□□K

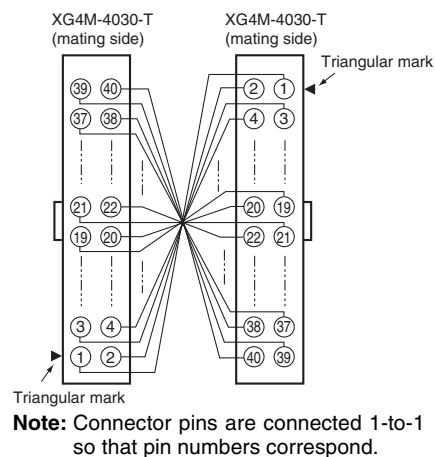

### Ordering Information

Applicable PLC Units	Special Connecting Cables		Applicable Connector-Terminal Block
	Cable length L (m)	Model	
CJ1W-ID232 CJ1W-OD232 (MIL Connector Unit)	1.0	XW2Z-100A	XW2B-40G4
	1.5	XW2Z-150A	XW2B-40G5
	2.0	XW2Z-200A	XW2D-40G6
	3.0	XW2Z-300A	XW2D-40G6-RM
	5.0	XW2Z-500A	(See note.)

Note: Only use the CJ1W-ID232 terminal block with bleeder resistor.

### Wiring Diagram

## XW2Z-□□□N

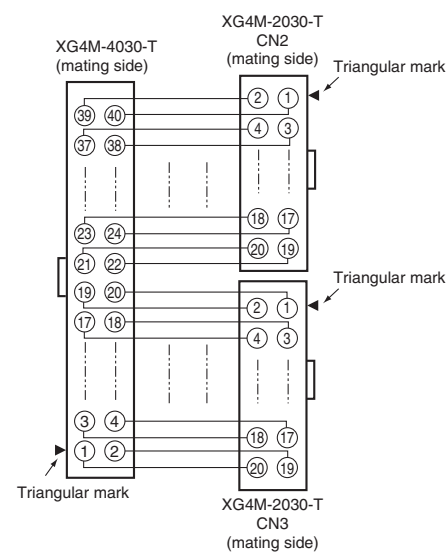

### Ordering Information

Applicable PLC Units	Special Connecting Cables		Applicable Connector-Terminal Block
	Cable length (m)		
	A	B	
CJ1W-ID232 CJ1W-OD232 (MIL Connector Unit)	1.0	0.75	XW2Z-100N
	1.5	1.25	XW2Z-150N
	2.0	1.75	XW2Z-200N
	3.0	2.75	XW2Z-300N
	5.0	4.75	XW2Z-500N

Note: Only use the CJ1W-ID232.

### Wiring Diagram

**Connectors and terminal block in a single unit reduces wiring between Servo Drivers and Position Control Units.**

- Simplifies control signal wiring between Servo Drivers and Position Control Units.
- With no soldering connections, a screwdriver is all you need.
- Special cables available for between Units.
- Only a 24-VDC power supply is required for control signals.
- Space-saving terminals blocks with M3 screws.
- Mount to DIN Track or via screws.

### ■ Ordering Information

#### Servo Relay Units

Name	Applicable Units	Model
One-axis Servo Relay Unit	CJ1W-NC1□3 CS1W-NC1□3 C200HW-NC113 C200H-NC112 3F88M-DRT141	XW2B-20J6-1B

## ■ Servo Relay Unit Specifications

### Ratings and Characteristics

Item	XW2B-□□J6-□
Rated current	1 A (temperature rise plus 30°C max.)
Rated voltage	24 VDC
Insulation resistance	5 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.)
Degree of protection	IP00 IEC standard
Electrical protection class	Class 0
Operating temperature	0 to 55°C

### Materials and Finish

Item	Part name	Materials and finish
Units	Main Unit/Expansion Unit	PBT resin (UL94V-0)/gray
	DIN Track lock	POM resin (UL94HB)/yellow
Flat Cable Connectors	Housing	PBT resin (UL94V-0)/black
	Contacts	Brass/gold plated
Terminal Block	Main Unit	PBT resin (UL94V-0)/black
	Connecting screw	Steel/nickel plated
	Cover	PC resin (UL94V-0)/transparent
PCB	---	FCL-GE4 Glass-epoxy Board

## ■ Position Control Unit and Servo Driver Connecting Cable Specifications

### Ratings and Characteristics

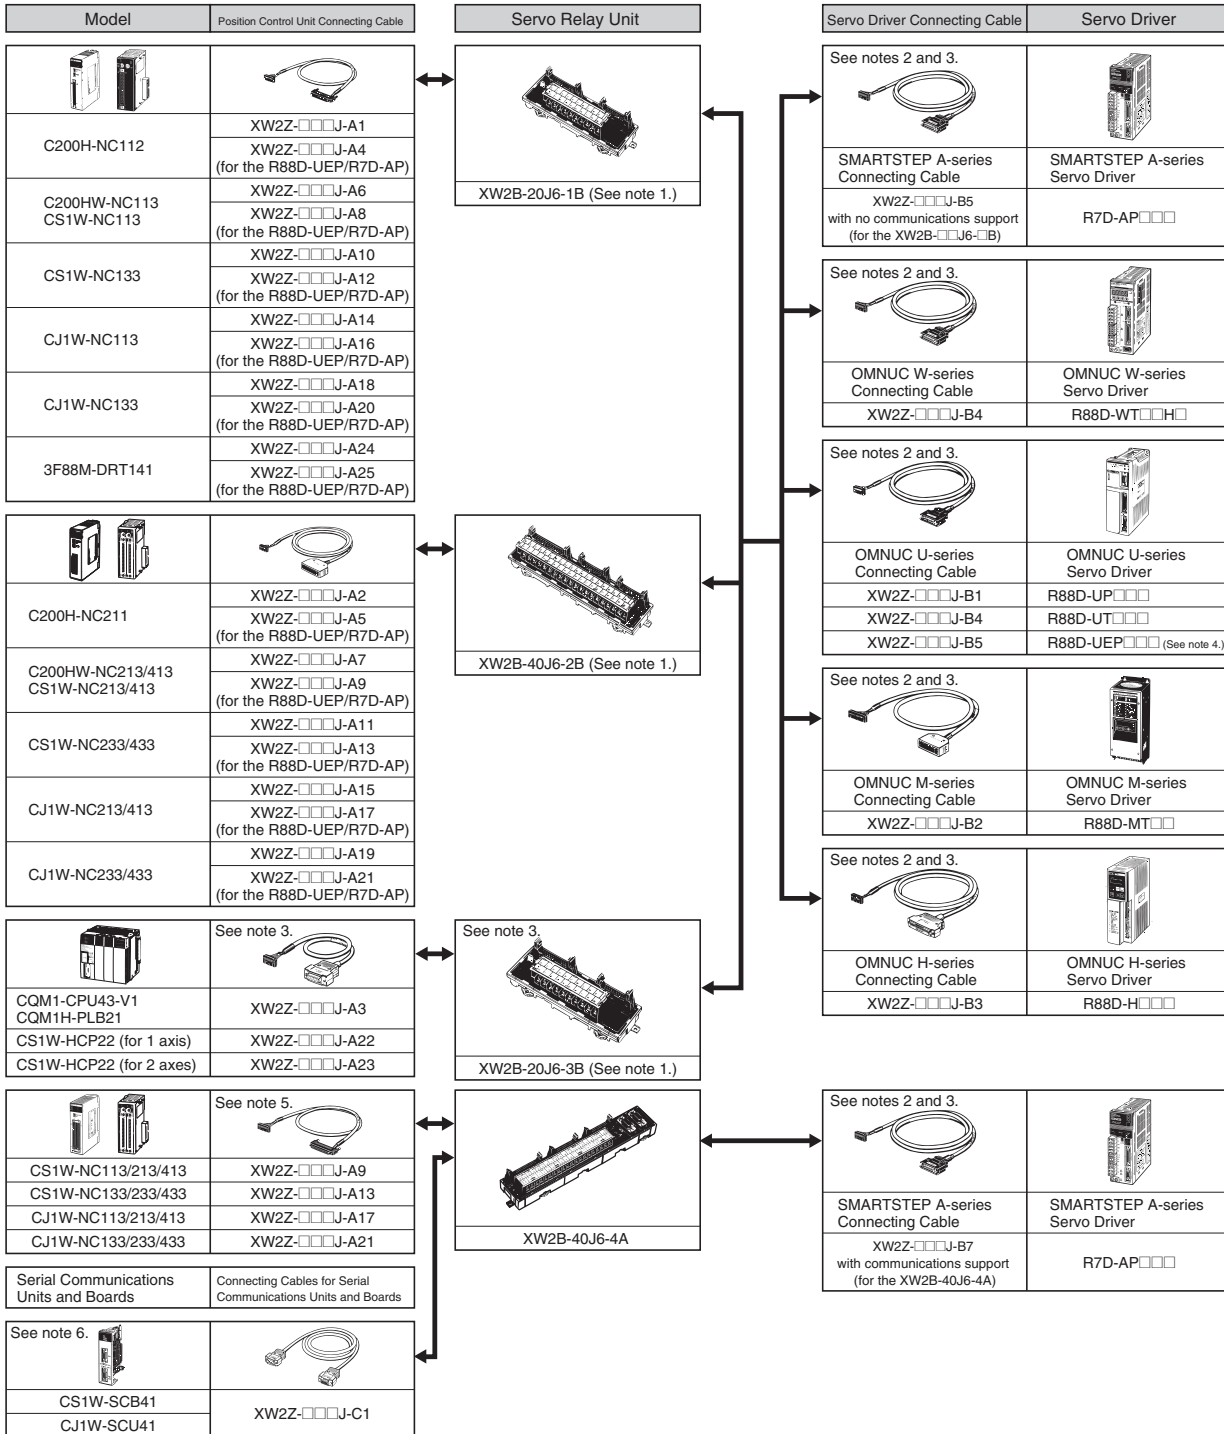

Item	Specifications
Rated current	1 A (temperature rise plus 30°C max.)
Rated voltage	24 VDC
Contact resistance	20 mΩ max. (at 20 mV, 100 mA max.) (See note 1.)
Insulation resistance	5 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.) (See note 2.)
Degree of protection	IP00 IEC standard
Electrical protection class	Class 0
Operating temperature	0 to 55°C

- Note:** 1. Contact resistance of the Connector.  
2. Dielectric strength of the Connector.

### Materials and Finish

Item	Part name	Materials and Finish		
Connectors	XG4M-1630 XG4M-2030 XG4M-3430	Housing	Fiber-glass reinforced PBT resin (UL94V-0)/black	
		Cover		
		Contacts	Mating end	Phosphor bronze/nickel base, 0.15-μm gold plating
			Press-fit end	Phosphor bronze/nickel base, 2.0-μm tin plating
	XG4T-1604/2004/3404	Strain Relief	Fiber-glass reinforced PBT resin (UL94V-0)/black	
	XM2A-1501 XM2D-1501	Housing	Polyamide resin (UL94V-0)/milky white	
		Contact terminals	Mating end	Brass/nickel base, 0.2-μm gold plating
			Press-fit end	
		Shell	Steel/nickel plated	
	XM2S-1511/3711	Housing	ABS resin/nickel plated	
FCN-367J040-AU/F	Housing	PBT resin (UL94V-0)/black		
	Contacts	Mating end	Phosphor bronze/gold plated	
		Press-fit end	Phosphor bronze/tin plated	
	Connecting screw	Steel/nickel plated		
MR-34LF MR-50LF	Housing	Fiber-glass reinforced PBT resin (UL94V-0)/black		
	Contacts	Mating end	Brass/nickel base, silver plated	
	Cover	ABS resin (UL94-HB)		
10136-3000VE 10150-3000VE	Housing	Fiber-glass reinforced PBT resin (UL94V-0)/black		
	Contacts	Copper alloy/nickel base, 0.5-μm gold plating		
10136-52A0-008 10130-52A0-008	Housing	Fiber-glass reinforced PBT resin (UL94V-0)/black		
Cable	UL2464 Interface Cable	AWG28 or the equivalent		

## ■ Servo Relay Unit, Servo Driver and Position Control Unit Combinations

- Note:**
- Same functions as conventional models, such as the XW2B-20J6-2, XW2B-40J6-2, and XW2B-20J6-3, and connects to the R88D-UEP□□□.
  - Two Servo Driver Connecting Cables are required per Relay Unit when using the C200H-NC211, C200HW-NC213/413, or CS1W-NC213/233/413/433.
  - Two Relay Units, two Position Control Connecting Cables, and two Servo Driver Connecting Cables are required when using the CQM1-CPU43-V1 for 2-axis control.
  - Use the XW2Z-□□□J-A4 Connecting Cable for the C200H-NC112, the XW2Z-□□□J-A8 Connecting Cable for the C200HW-NC113 and CS1W-NC113, the XW2Z-□□□J-A5 Connecting Cable for the C200H-NC211, and the XW2Z-□□□J-A9 Connecting Cable for the C200HW-NC213/413 and CS1W-NC213.
  - Do not connect a signal lines to the Y-axis terminals on the XW2B-40J6-4A when connected to a Position Control Unit used for one-axis control.
  - Use this cable between XW2B-40J6-4A communications connectors to control two or more axes.

**Note:** For 2-axis control, two Servo Driver Connecting Cables are required for each Relay Unit.

# XW2B Servo Relay Units

For the C200H-NC112, C200HW-NC113, CS1W-NC113/133, CJ1W-NC113/133, 3F88M-DRT141 (with a Terminal Block with M3 Screws)

## ■ Dimensions

XW2B-20J6-1B

Note: Terminal block pitch is 7.62 mm.

### Wiring Terminal Blocks

Signal names for the terminal block depend on the Servo Driver that is connected.

Refer to the user's manual provided with the Servo Driver for details.

(Terminal nameplates are provided and the correct one must be inserted into the terminal covers according to the type of Servo Driver that is connected.)

**C200H-NC112, C200HW-NC113, CS1W-NC1□3, CJ1W-NC1□3, 3F88M-DRT141: SMARTSTEP and OMNUC W, U, and UE Series**

Use mode 2 for origin searches.

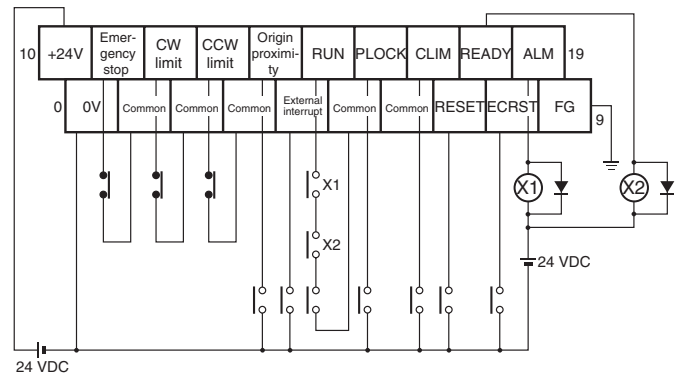

**C200H-NC112, C200HW-NC113, CS1W-NC1□3, CJ1W-NC1□3, 3F88M-DRT141: OMNUC H Series**

Use mode 3 for origin searches.

**C200H-NC112, C200HW-NC113, CS1W-NC1□3, CJ1W-NC1□3, 3F88M-DRT141: OMNUC M Series**

Use mode 3 for origin searches.

- Note:**
- The XB contact is used to turn ON/OFF the electromagnetic brake.
  - The MING input is disabled for SMARTSTEP.
  - Signal names depend on the Servo Driver that is connected.
  - Refer to the user's manual provided with the Servo Driver for signal name details.
  - Do not connect unused terminals.
  - The 0 V terminal is internally connected to the common terminals.
  - The following crimp terminal is applicable: R1.25-3 (round or forked)
  - Three terminal nameplates are provided with the terminal block and the correct one must be inserted into the terminal covers according to the type of Servo Driver that is connected.

Type	Nameplate color
SMARTSTEP and OMNUC W, U, and UE Series	Black
OMNUC M Series	Red
OMNUC H Series	Green

# XW2B Servo Relay Units

For the C200H-NC211, C200HW-NC213/413, CS1W-NC213/233/413/433, CJ1W-NC213/233/413/433 (with Terminal Block with M3 Screws)

## ■ Dimensions

XW2B-40J6-2B

### Wiring Terminal Blocks

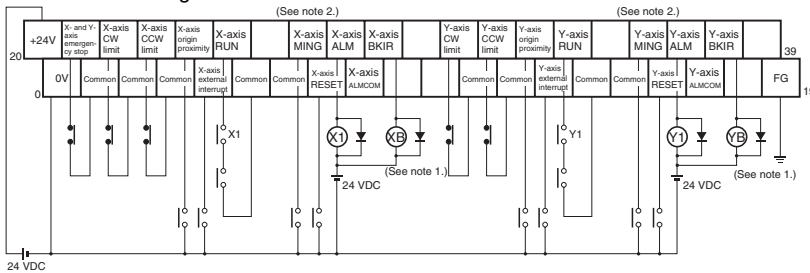

Signal names for the terminal block depend on the Servo Driver that is connected.

Refer to the user's manual provided with the Servo Driver for details.

(Terminal nameplates are provided and the correct one must be inserted into the terminal covers according to the type of Servo Driver that is connected.)

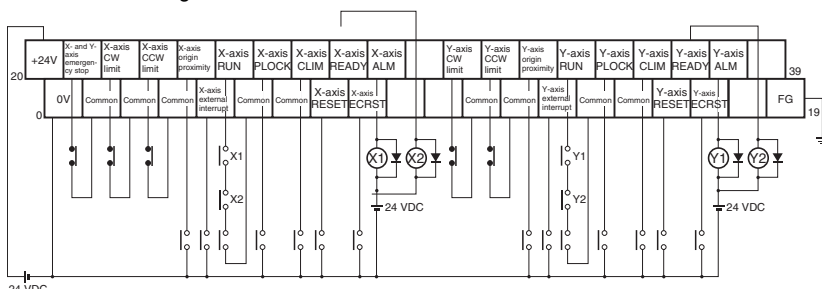

**C200H-NC211, C200HW-NC213/413, CS1W-NC213/233/413/433, CJ1W-NC213/233/413/433:**  
**SMARTSTEP and OMNUC W, U, and UE Series**

Use mode 2 for origin searches.

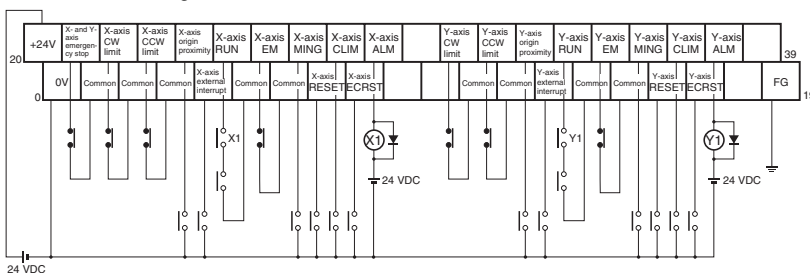

**C200H-NC211, C200HW-NC213/413, CS1W-NC213/233/413/433, CJ1W-NC213/233/413/433:**  
**OMNUC M Series**

Use mode 3 for origin searches.

**C200H-NC211, C200HW-NC213/413, CS1W-NC213/233/413/433, CJ1W-NC213/233/413/433:**  
**OMNUC H Series**

Use mode 3 for origin searches.

- Note:**
1. The YB/XB contact is used to turn ON/OFF the electromagnetic brake.
  2. The MING input is disabled for SMARTSTEP.
  3. Signal names depend on the Servo Driver that is connected.
  4. Refer to the user's manual provided with the Servo Driver for details.
  5. Connect the CW and CCW limit signals of the unused axis to a common terminal when controlling one axis.
  6. Do not connect unused terminals.
  7. The 0 V terminal is internally connected to the common terminals.
  8. The following crimp terminal is applicable: R1.25-3 (round or forked)
  9. Connect the CW and CCW limit signals of the unused axis to a common terminal when using the XW2B-40J6-2 (B) (terminal block for two-axis control) for one-axis control.
  10. Three terminal nameplates are provided with the terminal block and the correct one must be inserted into the terminal covers according to the type of Servo Driver that is connected.

Type	Nameplate color
SMARTSTEP and OMNUC W, U, and UE Series	Black
OMNUC M Series	Red
OMNUC H Series	Green

# XW2B Servo Relay Unit

For the CS1W-NC1□3/2□3/4□3, CJ1W-NC1□3/2□3/4□3 (with Terminal Block with M3 Screws)

## ■ Dimensions

XW2B-40J6-4A

Note: Terminal block pitch is 7.62 mm.

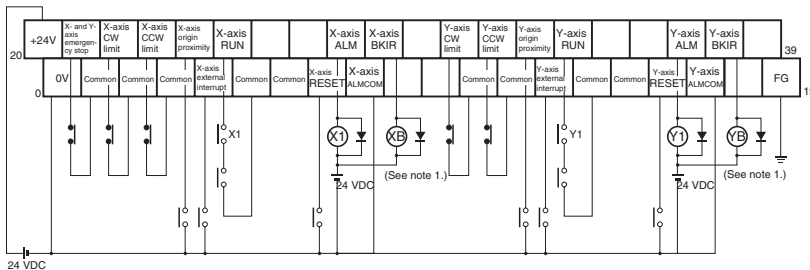

### Wiring Terminal Blocks

Signal names for the terminal block depend on the Servo Driver that is connected.

Refer to the user's manual provided with the Servo Driver for details.

(Terminal nameplates are provided and the correct one must be inserted into the terminal covers according to the type of Servo Driver that is connected.)

### CS1W-NC1□3/2□3/4□3, CJ1W-NC1□3/2□3/4□3: SMARTSTEP Series

- Note:**
1. The YB/XB contact is used to turn ON/OFF the electromagnetic brake.
  2. Do not connect unused terminals.
  3. The 0 V terminal is internally connected to the common terminals.
  4. The following crimp terminal is applicable: R1.25-3 (round or forked)

**Note:** Do not connect signal lines to the Y-axis terminals when connected to a Position Control Unit used for one-axis control.

# XW2B Servo Relay Unit

For the CS1W-HCP22, CMQ1-CPU43, CQM1H-PLB21 (with Terminal Block with M3 Screws)

## ■ Dimensions

XW2B-20J6-3B

Note: Terminal block pitch is 7.62 mm.

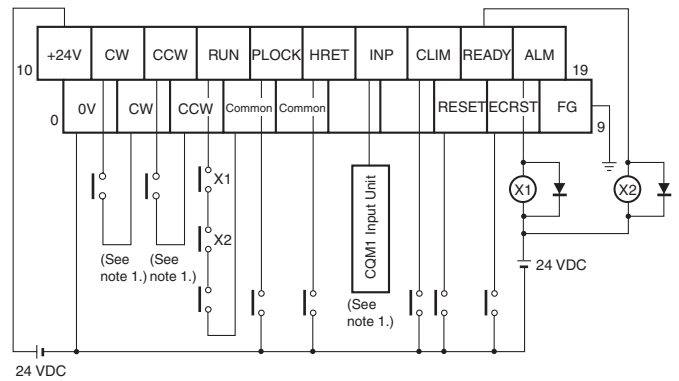

### Wiring Terminal Blocks

Signal names for the terminal block depend on the Servo Driver that is connected. Refer to the user's manual provided with the Servo Driver for details. (Terminal nameplates are provided and the correct one must be inserted into the terminal covers according to the type of Servo Driver that is connected.)

#### CQM1-CS1W-HCP: SMARTSTEP and OMNUC W, U, and UE Series

#### CQM1: OMNUC M Series

#### CQM1: OMNUC H Series

- Note:**
1. Inputting these signals will return the CQM1 output pulses and input the to the high-speed counter.
  2. Input this output signal to a CQM1 Input Unit.
  3. The XB contact is used to turn ON/OFF the electromagnetic brake.
  4. The MING input is disabled for SMARTSTEP.
  5. An open-collector output is used for the phase Z.
  6. Do not connect unused terminals.
  7. The 0 V terminal is internally connected to the common terminals.
  8. The following crimp terminal is applicable: R1.25-3 (round or forked)

Type	Nameplate color
SMARTSTEP and OMNUC W, U, and UE Series	Black
OMNUC M Series	Red
OMNUC H Series	Green

# XW2B Servo Relay Unit

For the CJ1M-CPU22/23 (with Terminal Block with M3 Screws) (For One-axis Control)

## ■ Dimensions

XW2B-20J6-8A

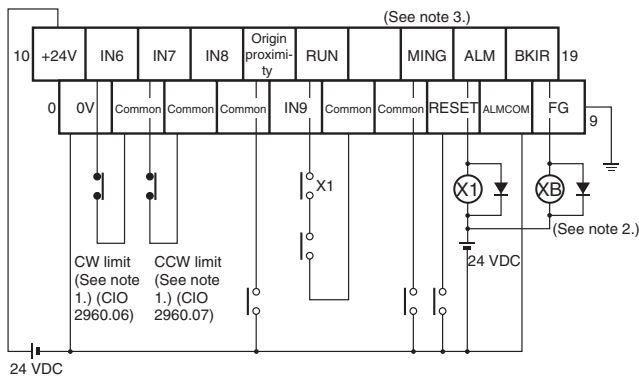

Note: Terminal block pitch is 7.62 mm.

### Wiring Terminal Blocks

Signal names for the terminal block depend on the Servo Driver that is connected. Refer to the user's manual provided with the Servomotor and Servo Driver for signal name details.

#### CJ1M-CPU22/23: SMARTSTEP and OMNUC W Series

Use mode 2 for origin searches.

**Note: 1.** CW and CCW input signals may be used after inputting them to an Input Unit. The signals that function as CW/CCW limit inputs in the CJ1M are A540.08/A540.09 (CW/CCW) for pulse output 0 and A541.08/A541.09 (CW/CCW) for pulse output 1. Output the bit shown on the left to one of these bits using the ladder program as the actual CW/CCW limit input.

#### Example

2. The XB contact is used to turn ON/OFF the electromagnetic brake.
3. The MING input is disabled for SMARTSTEP.
4. Signal names depend on the Servo Driver that is connected.
5. Refer to the user's manual provided with the Servomotor and Servo Driver for signal name details.
6. Do not connect unused terminals.
7. The 0 V terminal is internally connected to the common terminals.
8. The following crimp terminal is applicable: R1.25-3 (round or forked)

# XW2B Servo Relay Unit

For the CJ1M-CPU22/23 (with Terminal Block with M3 Screws) (For Two-axis Control)

## ■ Dimensions

XW2B-40J6-9A

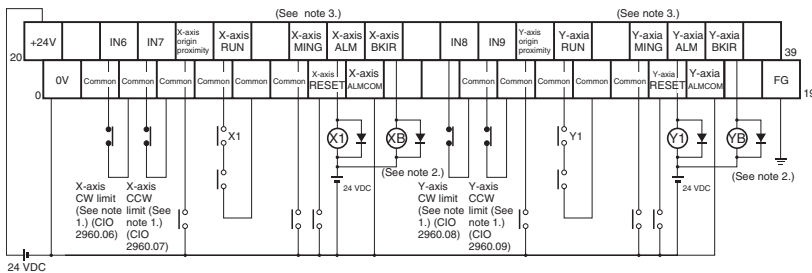

Note: Terminal block pitch is 7.62 mm.

### Wiring Terminal Blocks

Signal names for the terminal block depend on the Servo Driver that is connected. Refer to the user's manual provided with the Servomotor and Servo Driver for signal name details.

### CJ1M-CPU22/23: SMARTSTEP and OMNUC W Series

Use mode 2 for origin searches.

**Note: 1.** CW and CCW input signals may be used after inputting them to an Input Unit. The signals that function as CW/CCW limit inputs in the CJ1M are A540.08/A540.09 (CW/CCW) for pulse output 0 and A541.08/A541.09 (CW/CCW) for pulse output 1. Output the bit shown on the left to one of these bits using the ladder program as the actual CW/CCW limit input.

2. The YB/XB contact is used to turn ON/OFF the electromagnetic brake.
3. The MING input is disabled for SMARTSTEP.
4. Signal names depend on the Servo Driver that is connected.
5. Refer to the user's manual provided with the Servomotor and Servo Driver for signal name details.
6. Do not connect unused terminals.
7. The 0 V terminal is internally connected to the common terminals.
8. The following crimp terminal is applicable: R1.25-3 (round or forked)

- Note:**
- Two Servo Driver Connecting Cables are required with the Two-axis XW2B-40J6-2B.
  - For SMARTSTEP only.
  - For SMARTSTEP and the W Series only.

## ■ Precautions

### Wiring Precautions

- Do not connect unused terminals.
- The 0 V terminal is internally connected to the common terminals.
- Always turn OFF the power supply before wiring. Otherwise, cables or other conductors can short the terminals and cause the Unit to fail.
- Do not connect or disconnect Connectors with the power turned ON. Otherwise, it may cause malfunctions.

### Wiring Terminal Blocks

- Direct Wire Connections
  1. Use a wire size between 0.3 and 1.25 mm<sup>2</sup> (AWG22 to AWG16).
  2. Prepare the end of each wire as shown in the following diagram.

- Using Crimp Terminals
  1. The following crimp terminal is applicable:  
R1.25-3 (round or forked)

### DIN Track Mounting

- XW2B Servo Relay Units can be mounted side-to-side on DIN Track. The flanges for mounting screws are located on each side at the bottom of the XW2B.
- Secure both ends of the XW2B with End Plates.

### Terminal Screw Tightening Torque

- Use a tightening torque of 0.5 to 0.8 N·m when connecting wires or crimp terminals to the terminal block.

**Significantly reduces wiring manhours for Motion Control Units from the SYSMAC CVM1/CV Series.**

- A special cable connects all the Motion Control I/O Connector and terminal block contacts at once.
- Terminal labeling shows wiring status at a glance.
- Space-saving terminal blocks with M3 screws.
- Mount to DIN Track or via screws.

### ■ Combinations

Applicable Motion Control Units	Special Terminal Block	Special Connecting Cable
CV500-MC221 (Two Axes)	 XW2B-20J6-6	 XW2Z-100J-F1 (For two/four axes)
CV500-MC421 (Four Axes)	 XW2B-40J6-7	

### ■ Ratings and Characteristics

Item	XW2B-□□J6-□
Rated current	1 A
Rated voltage	24 VDC
Insulation resistance	5 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.)
Operating temperature	0 to 55°C

# For the Two-axis CV500-MC221 (with Terminal Block with M3 Screws)

## ■ Dimensions

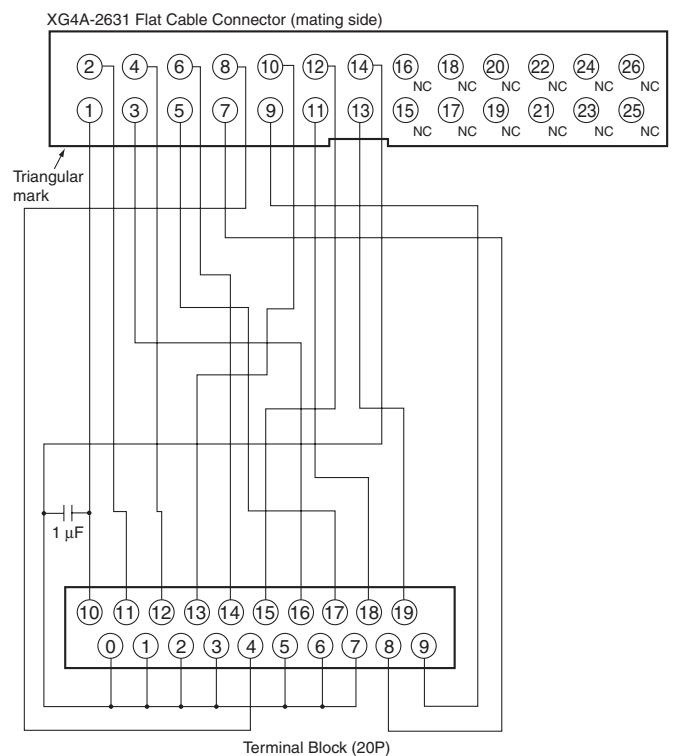

XW2B-20J6-6

# XW2Z Terminal Block Connecting Cables for Two-/four-axis Motion Control Units

## Motion Control Unit and Terminal Block Connections

### For the CV500-MC221/MC421

#### XW2Z-100J-F1

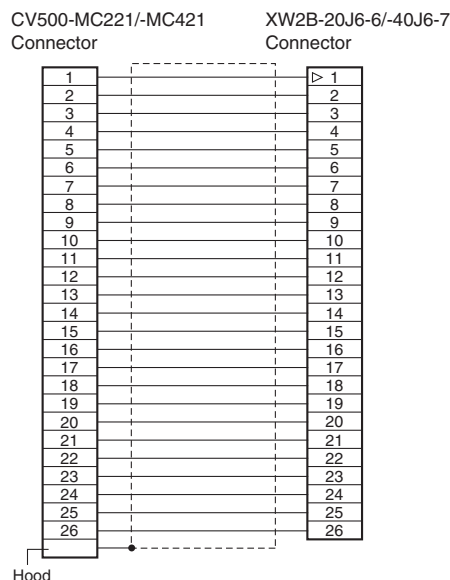

#### Applicable Connector

10126-6000EL (Connector) XG4M-2630-T  
 10326-3210-000 (Hood)  
 (Made by Sumitomo 3M)

#### Wiring Diagram

## ■ Ratings and Characteristics

Rated current	0.5 A
Rated voltage	24 VDC
Contact resistance	20 mΩ max. (at 20 mV, 100 mA max.) 35 mΩ max. (at 20 mA, 1.5 mA max.)
Insulation resistance	5 MΩ min. (at 500 VDC)
Dielectric strength	500 VAC for 1 min (leakage current: 1 mA max.)
Operating temperature	0 to 55°C

- Note:** 1. Contact resistance of the terminal block Connector.  
 2. Contact resistance of the Motion Control Unit Connector.  
 3. Dielectric strength of the terminal block and Motion Control Unit Connectors.

## ■ Materials and Finish

Item	Part name	Materials and finish
XG4A-2630-T Connector	Housing	Fiber-glass reinforced PBT resin (UL94V-0)/black
	Strain Relief	Fiber-glass reinforced PBT resin (UL94V-0)/black
	Contacts	Copper alloy/nickel base, 0.15-μm gold plating (mating end)
10126-6000EL Connector, 26-pin, press-fit Plug (made by Sumitomo 3M)	Housing	Fiber-glass reinforced polyester resin (UL94V-0)/black
	Contacts	Copper alloy/nickel base, 0.3-μm gold plating (mating end)
10326-3210-000 Hood (Made by Sumitomo 3M)	Straight plastic shell	ABS resin (UL94V-0)/beige
Cable	UL20276, BC14P-SB, AWG28 (7/0.127) or the equivalent	

## ■ Ordering Information

Cable length L (mm)	Model	Applicable Units	Applicable terminal block
1,000	XW2Z-100J-F1	CV500-MC221 (Two Axes) CV500-MC421 (Four Axes)	XW2B-20J6-6 XW2B-40J6-7

## ■ Precautions

### Correct Use

#### Wiring

- Do not connect unused terminals.
- The 0 V terminal is internally connected to the common terminals.
- Always turn OFF the power supply before wiring. Otherwise, cables or other conductors can short the terminals and cause the Unit to fail.
- Do not connect or disconnect Connectors with the power turned ON. Otherwise, it may cause malfunctions.

#### Wiring Terminal Blocks

##### Using Crimp Terminals

The following crimp terminal is applicable:  
R1.25-3 (round and forked)

#### DIN Track Mounting

- XW2B Motion Control Unit terminal blocks can be mounted side-to-side on DIN Track. The flanges for mounting screws are located on each side at the bottom of the XW2B.
- Secure both ends of the XW2B with End Plates.

#### Terminal Screw Tightening Torque

- Use a tightening torque of 0.5 to 0.8 N·m when connecting wires or crimp terminals to the terminal block.

Ideal cables for connecting Programmable Controllers to personal computers and other host devices.

### ■ Connection Example

SYSMAC PLC  
CQM1  
C Series  
CV Series  
CVM1

XW2Z Host Link Cable

Host  
Personal computer  
Factory Intelligent Terminal  
Programmable Terminal

			Terminals	
	Shell	Steel/nickel plated		
	XM2S-0911/2511	Housing	ABS resin/nickel plated	
Cable	UL2464 Interface Cable		AWG28 or the equivalent	

## Connector-Terminal Block Conversion Units with 16-point Terminal Block with Common and Screwless Terminals

# XW2F

### Accelerates Reductions in Factory Wiring and Labor with Screwless Terminals.

- Clamp terminals eliminate the need to tighten screws.
- Just insert pole terminals to complete one-touch wiring.

**NEW**

### Ordering Information

Number of input/outputs	Number of contacts	I/O	Model	Mounted Connector model	Cable Connector model
16	20	Inputs	XW2F-20G7-IN16	XG4A-2031	XG4M-2030-T
		Outputs	XW2F-20G7-OUT16		

### Ratings and Characteristics

Rated current	1 A/point, 4 A/common	
Rated voltage	24 VDC	
Insulation resistance	100 MΩ min. (at 500 VDC)	
Dielectric strength	500 VAC for 1 min	
Operating temperature	-10 to 55°C	
Applicable wires	Applicable wire sizes	AWG24 to AWG16 (core cross-sectional area: 0.2 to 1.5 mm <sup>2</sup> ) Outer diameter of insulation must be 3.3 mm max.
	Stripped length	9 to 11 mm

### Dimensions (Unit: mm)

XW2F-20G7-IN16

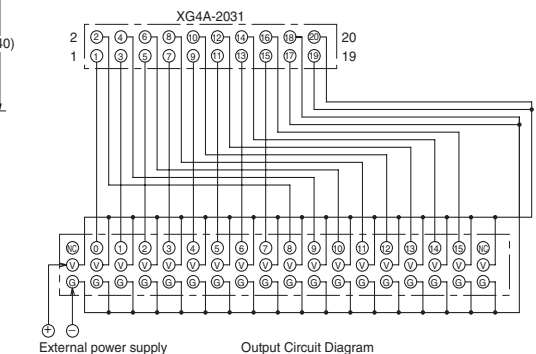

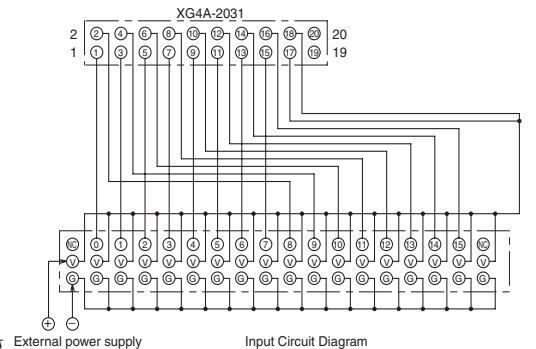

Note: XW2F-20G7-OUT16 is printed on the output side.

## Connector-Terminal Block Conversion Units with 16-input *e-CON* Terminal Block with Common

# XW2N

### Conversion Unit with Industrial Standard *e-CON* Terminal Block Connectors

- I/O connectors for easier wiring.
- Easy connections via connectors (no special tools required).
- Compatible with e-CON connectors from other companies.

**NEW**

### Ordering Information

Number of inputs	Number of contacts	I/O	Model	Mounted Connector model	Cable Connector Model
16	20	Inputs	XW2N-20G8-IN16	XG4A-2031 (PLC side) XN2D-4431 (input side)	XG4M-2030-T (PLC side) XN2A-1430 (input side)

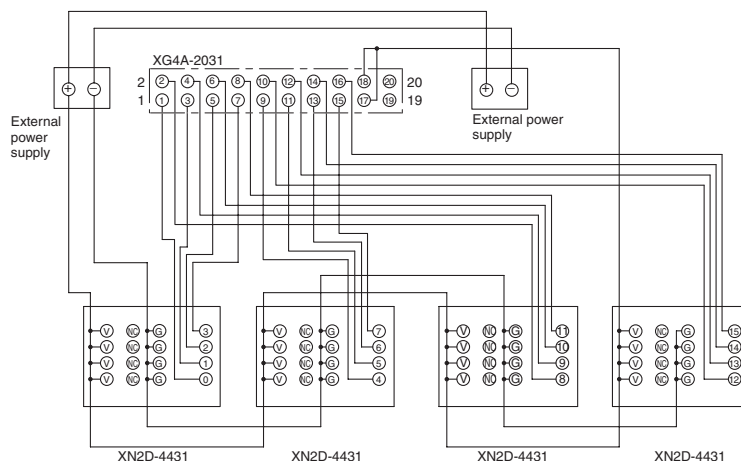

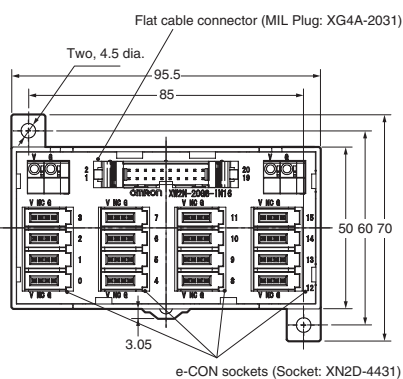

### Ratings and Characteristics

Rated current	0.5 A/input, 4 A/common	
Rated voltage	24 VDC	
Insulation resistance	100 MΩ min. (at 500 VDC)	
Dielectric strength	500 VAC for 1 min	
Operating temperature	-10 to 55°C	
Applicable wires	Applicable wire sizes	AWG24 to AWG16 (core cross-sectional area: 0.2 to 1.5 mm <sup>2</sup> );
	Stripped length	9.5 to 10.5 mm

**Note:** These are the applicable sizes for the terminal block.  
Refer to information on the applicable connector for input connector wire sizes.

### Dimensions (Unit: mm)

#### XW2N-20G8-IN16

**Note:** The XN2A-143 Input Connector is sold separately. Please order it separately.

# Connector Cables

## I/O Device Connectors (For the XW2N-20G8-IN16)

Model	Appearance	Applicable wire size
XN2A-1430		AWG28 to AWG20 (0.08 to 0.5 mm <sup>2</sup> ), outer diameter of wire insulation: 1.5 mm max.

### Connection Procedure

#### Preparing Wires

Strip 7 to 8 mm of the wire insulation using the STRIP GAUGE on the Connector as a guide, and twist the wire strands together several times.

#### Connecting Wires

1. Insert a flat-bladed screw driver and press the operation lever inside the operation opening until it locks open.

2. Insert the wire all the way to the back of the wire insertion opening. Confirm that the wire insulation has entered the wire insertion opening and that the end of the core has passed through the contact section.

3. Insert the screwdriver in the release opening and gently press the lever until it clicks back to its original position.

4. Confirm the following items.

- The operation level has returned to its original position.
- That the wire and wire insulation are in the proper positions, as described in step 2. (Pull on the wire lightly to be sure it is connected.)

#### Removing Wires

1. Insert a flat-bladed screw driver and press the operation lever inside the operation opening until it locks open and then pull out the wire.
2. Always return the operation lever to its original position after removing a wire. If another wire is to be connected, however, it can be connected immediately without returning the operation lever first.

### Special PLC Connecting Cables

Model	Description
XW2Z-□□□A	For 16 points, PLC connector (24 poles) to MIL connector (20 poles)
XW2Z-□□□D (See note 3.)	For 32 inputs, PLC connector (40 poles) to MIL connector (20 poles) x 2
XW2Z-□□□L (See note 3.)	For 32 outputs, PLC connector (40 poles) to MIL connector (20 poles) x 2

**Note:** 1. The boxes are replaced by the cable length code as follows: 100: 1 m, 150: 1.5 m, 200: 2m, 300: 3 m, 500: 5m.

2. These Cables branch into two 16-point cables. Two XW2F or XW2N Connector-Terminal Block Conversion Units are thus required.

## Precautions

### Precautions for Correct Use

#### XW2F-20G7-IN16, XW2F-20G7-OUT16, and XW2F-20G8-IN16

##### Wiring Precautions

- Do not perform wiring work, remove connectors, or connect connectors while power is being supplied. Electric shock or damage to the device may result.
- Double-check all wiring before turning ON the power supply.
- After wiring, confirm that the cable is connected.
- After wiring, route the cable so that force is not applied directly to the connections.

- Insert only one wire in each wire insertion opening. It may not be possible to remove the wires if more than one wire is inserted.
- Do not apply a current higher than the rated value. Be sure to check the rated current, which depends on the model of the cable.

##### Wires for Terminal Blocks

- Do not damage the cores when stripping the insulation from them.
- Always twist stranded wires together before connecting them.
- Do not presolder wires. It may not be possible to connect them or remove them.

**Mounting to and Removing from DIN Track**

- When mounting the Unit to a DIN Track, release the lock on the slider, mount the Unit to DIN Track, and then lock the slider back in place.
- After locking the slider, confirm that the Unit is actually locked on the DIN Track.
- When removing the Unit from a DIN Track, insert a screwdriver into the slider, release the lock, and remove the Unit from the DIN Track.
- Always secure the Unit(s) on the DIN Track by mounting End Plates on either end. The following products are sold separately.

DIN Track	PFP-50N PNP-100N
End Plates	PFP-M

**Applicable Post Terminals**

- Use post terminals of the lengths and thicknesses specified below. If other lengths or thicknesses are used, connection may not be possible or it may not be possible to insert or remove the posts.
- **Post Terminal Ranges (for XW2F-20G7-IN16/OUT16 and XW2F-20G8-IN16 power supply terminals)**

Square post

Round post

XW2F-20G7-IN16 or XW2F-20G7-OUT16			
Square posts	Dimension A	1.0 to 2.3	The cross-sectional area after crimping must be 4.8 mm <sup>2</sup> or less
	Dimension B	0.8 to 2.65	
Round posts	Dimension C	0.8 to 2.3 dia.	
XW2F-20G8-IN16 (power supply terminals)			
Square posts	Dimension A	1.0 to 2.0	
	Dimension B	0.8 to 1.3	
Round posts	Dimension C	0.8 to 1.3 dia.	

**Recommended Post Terminals and Crimp Tools**

Type of terminal	Manufacturer	Size	Post terminal model	Recommended crimp tool
Square post terminal	Phoenix Contact	AWG24	A10.25-8YE	UD6 ZA3
		AWG22	A10.34-8TQ	
		AWG20	A10.5-10WH	
			A10.5-8WH	
		AWG18	A10.75-10GY	
	AWG16	A10.75-8GY		
		A11.5-10BK (See note.)		
	Nihon Wielder-muller	AWG24	H0.25/12	PZ6 roto
		AWG22	H0.34/12	
		AWG20	H0.5/16	
H0.5/14				
AWG18		H0.75/16		
AWG16	H1.5/16 (See note.)			
Round post terminal	Nichifu	AWG22	TGV TC-1.25-11T	NH11 NH21 NH65
		AWG20	TGN TC-1.25-11T	
		AWG18		
		AWG16		

**Note:** The AWG16 post terminals from Phoenix Contact and Nihon Wielder-muller cannot be used for the power supply terminals on the XW2N-20G8-IN16.

**Wiring Terminal Blocks**

- Insert wires as follows:  
Stranded wires: Press in on the lever with a flat-blade screwdriver (1). Insert the wire (2).  
Solid wires or post terminals: Insert the wire/post to the back of the wire insertion opening. (The lever does not need to be used.)
- Remove wires as follows: Press in on the lever with a flat-blade screwdriver (1). Remove the wire (3).

XW2F-20G7-IN16  
XW2F-20G7-OUT16

XW2N-202G-IN16

- To operate the lever, use a flat-blade screwdriver with a fixed thickness from the tip to the base of the screwdriver, as specified below.

<b>Dimension D</b>	0.3 to 0.8
<b>Dimension E</b>	2.9 to 3.6

OMRON provides the following flat-blade screwdrivers for use in operating the lever.

**Recommended Flat-blade Screwdrivers**

Model
XW4Z-00B
XW4Z-00C
